EDUCATION

University of Florida | Gainesville, Florida

May 2026

Bachelor of Science in Computer Science

GPA: 3.50

Minor in Digital Arts and Sciences

TECHNICAL SKILLS

Programming Languages: C++, Java, C#, Python, JavaScript, GDScript

Frameworks & Libraries: Unity, Godot, SFML, Pygame, FUSE, React, jQuery, Pandas, SQLAlchemy

Systems & Software Concepts: Linux, Object-Oriented Design, Data Structures, Algorithms, AST Parsing, Regex-Based Tokenization, File Systems

Tools: Git, CMake, GDB, Visual Studio, VS Code, Linux Command Line

Software: Microsoft Office, Adobe Photoshop, Aseprite

TECHNICAL PROJECTS

WAD File System (FUSE) | C++, Linux

Spring 2025

- Created a userspace filesystem daemon using FUSE that mounts classic WAD files in Linux
- Developed a C++ library to parse WAD headers, descriptors, and data lumps into directories/files
- Enabled persistent file and directory creation with read/write by modifying WAD descriptors

Custom Programming Language | Java

Spring 2025

- Implemented a statically scoped programming language in Java
- Designed a modular architecture separating the lexer, parser, analyzer, evaluator, and generator
- Implemented scope management, type checking, and function closures
- Utilized regex-based tokenization and visitor patterns for AST traversal

Formula 1 Multi-Season ETL Pipeline (In Progress) | Python, PostgreSQL

Spring 2026

- Built a Python ETL pipeline with PostgreSQL to process Formula 1 race results across multiple seasons using a normalized relational schema (drivers, teams, races, contracts)
- Implemented data transformation and entity resolution logic to maintain consistency
- Developing multi-season analytics and SQL reporting for pipeline monitoring and data integrity

47 Ronin Game | GDScript, Godot

Spring 2026

- Contributed to a collaborative software project using the Godot engine and GDScript
- Lead development of scalable inventory management and collectible item systems
- Implemented reusable gameplay systems while coordinating code integration in a team environment

LEADERSHIP EXPERIENCE

Officer, UF Pair-A-Dice Board Game Club

May 2025 - 2026

- Help organize weekly meetings and campus events for a large student organization
- Coordinate event logistics and member engagement activities
- Support community growth through collaborative leadership and event coordination
